

SHERIA GACHABA JASON

SOFTWARE DEVELOPER, DATA SCIENCE & INFORMATION MANAGEMENT EXPER

A Computer Science Engineer with over five years of experience in software development, database administration, and data science. My expertise spans from designing IT solutions to information management and performance reporting. I specialize in using tools like Power BI and managing complex systems to optimize processes. I also design predictive models for businesses and individuals, transforming raw data into strategic insights. My proven experience in government and as a consultant allows me to bring a strategic and collaborative approach to any role. I am fluent in both French and English.
